

STAY AHEAD WITH ONE STOP SERVICE SOLUTIONS

SVANEHØJ

POWERING A BETTER FUTURE

The accelerating climate changes call for a complete transformation from fossil fuels to clean and renewable energy types. At Svanehøj, we take pride in having the knowledge, the pump solutions, and critical components to develop a safe and fast transition.

Temperatures are rising. Sea ice is melting faster than ever before. Storms and droughts are becoming more and more severe. Already experiencing the consequences of climate change, we have to turn things around.

As a result, the shipping industry, which accounts for 80% of all world trade, is now making the most swift and pervasive measures to speed up decarbonization.

Being a long-trusted industry partner in pumping solutions for fuel and energy cargo supply, we are set to make a difference. In fact, we are already down the path.

We have the knowledge, the competencies, and adaptable solutions to support a fast and full transition to carbon-neutral maritime fuels, including ammonia, hydrogen, and synthetic carbon-based electro-fuels, and to carbon capture & storage.

As a green transition player, we will be committed to all types of sustainable solutions within liquid fluids – both on sea and land. Simultaneously, we will strive to be a role model for employees, partners, and our local community by continuous improvement of working conditions and taking responsibility for the impact we make through our business.

It's all a matter of powering a better future.

Svanehøj Service Solutions

Making every day more productive

Svanehøj Service Solutions is a global partner within service, repair and calibration of all types of cargo-equipment on gas, product and chemical carriers. Our Svanehøj Tank Control System is engaged in the production, sale, and service of high-end metering systems for gas tanks on LNG carriers and land-based LNG plants. And is particularly well known for its unique LTD Gauge for liquid measurement and its Rollover Predictor. Based on pioneering experience, technical know-how and a full range of services, we provide customized efficiency every step of the way.

Better together

Reliable service builds on trust and letting customers focus on their job. Everything we do at Svanehøj Service Solutions is tailored to ensure this.

As a result, you will always know your contact person in service from the start – and know that we never begin before we have in-depth knowledge of your challenges. Combined with thorough planning and skilled expertise this sets you up for safe and productive operations, 24/7.

Anything but standard

One size never fits all at Svanehøj Service Solutions. We believe that rigid service concepts reduce agility as well as individual strengths.

Thus, all our solutions are tailored to fit your specific needs.

It is simple: In order to stay ahead and perform efficiently and sustainably it is better for you to have a full range of services that are more than standard.

Pushing new boundaries

The maritime industry evolves constantly. Our most important task as a global service partner is to push on and ensure that you get the most out of the technological innovations.

Our approach to future-proof services comes with testing, measuring and knowledge sharing with customers as well as close partnerships with leading institutions and researchers from all over the world.

Certifications matters

We aim for superior quality and reliability at Svanehøj Service Solutions. Our certifications prove the point. We are authorised by major equipment suppliers to carry our service and supply OEM spare parts.

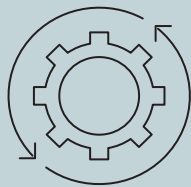

Leading matters

24-7 access to a global network of specialists

Svanehøj Service Solutions

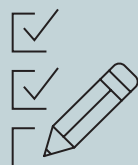

Meeting costumer needs from one end to the other

Svanehøj Service Solutions offers end-to-end services for cargo pumps, compressors, valves and instrumentation – no matter technology or origin of manufacturer. Backed up by experienced specialists and unique competences – all in one place – you will always be able to rely on the right help at the right time.

Genuine spare parts & spare part kits

Svanehøj Service Solutions carry a large number of spare parts in stock for pumps, compressors, valves and instrumentation. This ensures day-to-day delivery and less downtime for you. Moreover, Svanehøj Service Solutions is the only authorized supplier of OEM spare parts from major equipment suppliers.

Pre-docking inspection

We help our customers to plan and ensure effective dry-docking by offering pre-dock inspections. Before your vessel is scheduled to dry-dock, our specialists will board the vessel to inspect the cargo handling system. After a thorough inspection, we will issue a detailed inspection report to make sure the pre-dock is planned in details in regards to manpower, materials, timing and resources.

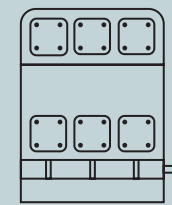

Worldwide and personal service

Svanehøj Service Solutions delivers worldwide and personalised 24-hour service, all year long. Fusing our global network, depth of expertise and exceptional response time we enable you to stay ahead wherever you are.

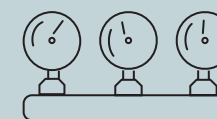

Service on deepwell pumps

Trained and certified in fast troubleshooting, specialists from Svanehøj Service Solutions are able to provide immediate repairs of your deepwell cargo pumps – both on site and in dry-dock.

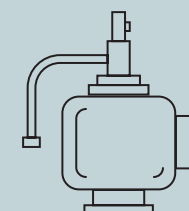

Cargo and cooling compressor service

No matter the complexity of you compressor system – and no matter the brand – our specialists deliver advanced maintenance and fast repair, reducing potential downtime to a minimum.

Calibrate measuring equipment

Calibration of measuring equipment – from cargo tank instrumentation to level gauge systems – is essential in order to ensure correct and optimal performance. Whether the vessel is a gas, product or chemical carrier, specialists from Svanehøj Service Solutions provides precise calibration, including documentation.

Safety valve service

Svanehøj Service Solutions offers complete service on valves on gas, product and chemical carriers. The service, carried out by experienced specialists, includes preventive maintenance, repairs and testing in order to ensure you safe and efficient operation.

One Stop Service Solutions for your cargo system

Svanehøj Service Solutions is part of Svanehøj Group and a specialised service partner. We deliver customized one-stop service on all cargo pumps, compressors, valves and instrumentation for product or chemical carriers.
