Svanehøj FlowControl Simply more efficient

Take control of your cargo performance

Let's be honest. The need for faster slot time is constant. So is the need for vessels and crews to operate better and faster. At Svanehøj – your specialist in deepwell cargo product and chemical pump solutions – we took on the challenge to provide something new.

With Svanehøj FlowControl we have come up with an electrical revolution. In other words, we have made perfect discharging of P&C a matter of the right software.

FlowControl is an application that makes existing VSD pumps suited to run in parallel at low loads - safe, fast and efficiently. It is software designed to do all the hard work for you.

Ensuring you with the most optimum setting, FlowControl not only makes for easier operation, it also allows you to take full control of pumps in parallel all the way through.

Combined with the renowned advantages of our electronic pumps – less weight, less noise, less power consumption – FlowControl simply delivers you a completely new performance standard within cargo P&C handling.

SVANEHO

In total control

Safe and efficient discharge is a demanding process. More than anything it requires hundreds of adjustments of each pump. With Svanehøj FlowControl it gets simpler. The new system ensures that adjustments must be made less often, and they can be made for all pumps simultaneously with just one button, providing you total control from start to finish.

More competitive

Svanehøj FlowControl is designed for superb parallel performance and immediate improvement of cargo handling. This starts by giving you control of the perfect flow. Because with the perfect flow you are safe to speed up costly off-loading processes, optimize operations and as a consequence get more out of your business at sea.

Easy to install

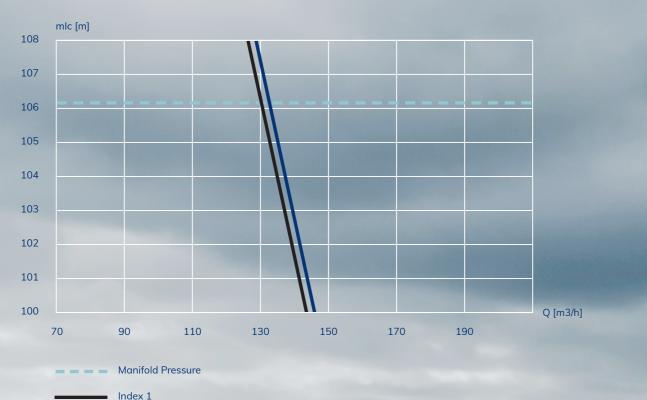

To obtain the benefits of the new Svanehøj FlowControl is easy. You only need an application, a piece of software that can be added to your existing system. We pay your vessel a visit and help you with the installation. Once our service engineer is onboard, your vessel will be upgraded in a few days.

Svanehøj FlowControl can be added to all existing Svanehøj DW Cargo P&C pumps and is also available with new ones.

FlowControl in numbers

Pumps in parallel in Index Mode

Note: Modest index difference results in modest flow difference.

Your trusted partner

With Svanehøj you get the most trusted electrical gas pump solutions on the market as well as a partner that provides you with a series of advantages.

Proven reliability

We have close to 100 years of experience and more than 7000 pumps currently operating on P&C carriers worldwide. This is your guarantee for proven reliability and outstanding performance.

Leading safety

Our pumps have gone through extensive testing to make sure they live up to the highest global safety standards. They feature double mechanical seals mounted back-to-back in oil bath to prevent leaks. on-site training on how to optimally use their pumps.
